

Be a global radiologist.

Join the Global Radiology Training Programme and kickstart your international career in radiology.

G RTP is India's first and only integrated radiology programme for MD/DNB students and working radiologists. Get the benefits of enhanced education, global faculty and focused training. Be a global radiologist.

G RTP makes international standard training available, accessible, and affordable for all radiologists in India.

highlights

01

2-year hybrid learning programme

02

Globally renowned UK/USA faculty

03

Module based and final certification

04

Specially designed international curriculum

05

Unique opportunity for professional development

06

Boosts chances of success in exams like EDiR, FRCR

07

Gain access to global employment opportunities

08

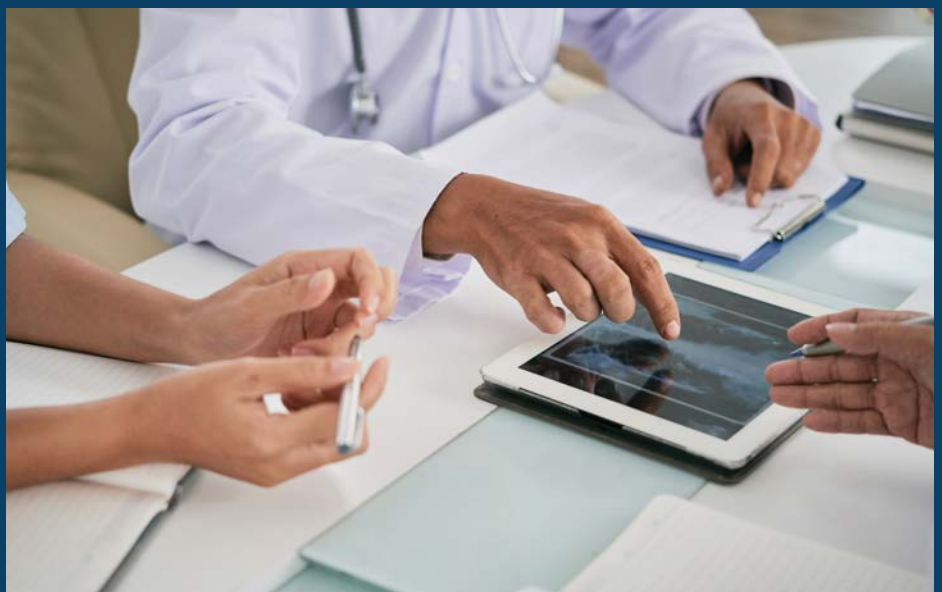

Acquire additional international qualifications

radiology++

GRTP (Global Radiology Training Programme) is a comprehensive training programme conducted by ARI Academy, a division of Apollo Radiology International. GRTP is designed for both radiology students and experienced radiologists who wish to enhance their knowledge and skills. The programme offers a unique opportunity to learn from experienced, international radiologists, use state-of-the-art technology and gain hands-on experience in interpretation of a wide range of imaging modalities.

Our well-structured curriculum

covers all aspects of radiology, including diagnostic radiology, interventional radiology, and nuclear medicine. The programme is led by a team of renowned radiologists who have extensive experience in teaching and clinical practice, providing participants with personalised attention and guidance throughout the programme. Participants also have access to our advanced facilities and cutting-edge technology, ensuring a world-class learning experience. Join the GRTP and take your first step towards becoming a global radiologist.

With higher qualifications come greater opportunities. Indian radiologists with internationally recognised qualifications such as the FRCR, EDiR, MiCR are sought after by some of the world's best medical institutions in the UK, the Middle East, Australia and elsewhere. GRTP is a bridge between traditional Indian radiology education and the specific skill sets and training required to pass global exams like the FRCR or pursue careers abroad.

global++

International training, without the dollar costs. Training positions in countries like the USA, UK and Canada are limited in number, extremely difficult to enter and prohibitively expensive. GRTP makes international-standard training available, accessible and affordable for all radiologists in India. Globally renowned faculty, exam focussed training, and a world-class syllabus give young Indian radiologists a competitive edge overseas.

GRTP is designed just for you. GRTP is India's first integrated radiology programme for both students and young working professionals. The course is structured to be flexible and can be taken either during your MD/DNB or directly after. In this way, GRTP prepares you for the rigorous international exams and sets you on the path to lucrative, long-term career opportunities.

The best of both worlds. GRTP is a hybrid learning programme that is delivered mostly online and partly onsite giving you the freedom and flexibility to pursue your existing studies and manage your family and work commitments while improving your radiology knowledge.

flexibility++

8 MODULES ACROSS 24 MONTHS • 6 HOURS LEARNING PER WEEK • ONLINE REVIEW EVERY 2 WEEKS • CASE BASED LEARNING • READING MATERIAL + RECORDED LECTURES • LIVE LECTURES WITH Q&A SESSIONS • GROUP AND INDIVIDUAL DISCUSSIONS • CLINICAL INTERACTIONS / MDT SCENARIOS • EVALUATION, FEEDBACK & APPRAISAL AFTER EACH MODULE • REGULAR ONSITE ASSESSMENTS, SIMULATION AND NETWORKING

course modules

- 01 Chest and Cardiac
- 02 MSK and Trauma
- 03 GI and Hepatobiliary
- 04 GU including Obstetrics and Gynaecology
- 05 Neuro including Head and Neck
- 06 Paediatrics
- 07 Breast
- 08 Intervention
- 09 Nuclear Medicine
- 10 General Training

course directors

Dr Sreenivasa Raju Kalidindi

MBBS, DipNB, FRCR
Director, ARI Academy,
CEO & Medical Director, Apollo Radiology
International, India
Former Head of Radiology at the Midyorkshire
Hospitals, NHS Trust, UK

Dr Subhasis Chakraborty

MBBS, MS, FRCS, FRCR
Professor of Paediatric Radiology & Consultant
Paediatric Radiologist Oxford, UK
Former Chair of FRCR 2B Examination Board & Chair
of RCR Learning, Royal College of Radiologists,
London, UK

faculty

Prof Simon Padley

BSc, MBBS, MRCP, FRCR
Consultant Radiologist,
Director of Radiology at
Royal Brompton Hospital,
Co-Founder of DMC
Radiology Reporting, UK

Prof Sujal R Desai

MD, FRCP, FRCR
Professor of Practice
(Thoracic Imaging), Imperial
College London &
Consultant Radiologist,
Royal Brompton Hospital,
London & Co-Director, DMC
Radiology Reporting, UK

Prof Sanjeeva Kalva

MBBS, MD
Chief, Division of
Interventional Radiology in
the Department of
Radiology, Massachusetts
General Hospital & Professor
of Radiology, Harvard
Medical School, USA

Prof Raghu Vikram

MBBS, MRCP, FRCR, MBA
Physician, Professor of
Radiology at MD Anderson
Cancer Center, Texas, USA

Dr Arumugam Rajesh

FRCR, FESGAR, FAcadMed
Honorary Professor &
Consultant Radiologist at
University Hospitals of
Leicester NHS Trust Head of
PG School of Radiology HEE
EM, Leicester, UK

Dr Raj Chari

MBBS, MRCS, MSc, FRCR,
DipESSR
Consultant Musculoskeletal
Radiologist, Oxford
University Hospitals, UK

Dr Ashok Raghavan

MBBS, DMRE, MD(Rad),
PDCC, DNB(Rad), FRCR
Consultant Paediatric
Radiologist, Sheffield
Children's Hospital, UK

Dr Randeep Kulshrestha

MBBS, FRCR
Clinical Director of Radiology
& the Trust Lead for Nuclear
Medicine at Bristol Royal
Infirmary & Weston General
Hospital, UHBW NHS
Foundation Trust, UK

Dr Sachin Mathur

MBBS, MD, MRCP, FRCR
Consultant Head, Neck &
Neuroradiologist at Royal
Preston Hospital, Lancashire
Teaching Hospitals
Foundation Trust, UK

Dr Thiru Sudarshan

MBBS, DMRD, FRCR, EBHNR
Consultant Head & Neck
Radiologist & Clinical
Director for Diagnostics,
Ninewells Hospital &
Medical School, Dundee, UK

Dr Vijay Papineni

MRCs, FRCR, CCT (UK),
ESSR Dip. MSK Radiology,
PG Prog. Artificial
Intelligence (USA)
Consultant Radiologist,
Sheik Shakhbout Medical
City (Mayo Clinic), Abu
Dhabi, UAE

**Dr Balamurugan
Rathinavelu**

MBBS, MRCP, FRCR, CCT
BSc, MBBS, MRCP, FRCR
Consultant Radiologist at
Sheik Shakhbout Medical
City (Mayo Clinic), Abu
Dhabi, UAE

Dr Asiya Maheen Khan

MBBS, FRCR
Consultant Breast
Radiologist at the Imaging
Institute, Cleveland Clinic,
Abu Dhabi, UAE

Dr Gayathri Senapathy

MBBS, DNB, FRCR
Associate Director, GI
Radiology in AIG Hospital,
Hyderabad, India

FAQs

Who is eligible for the GRTP?

MD/DNB students with at least 1 year of training and practising radiologists.

Will I receive certification at the end of the course?

Upon meeting the completion criteria in the final assessment, you will receive a certificate from ARI Academy and our international academic partner with your name, course name, and completion date, which will be generated in your account. The certificate is accessible online, where it can also be downloaded and printed. No salutations will be added to the name on the certificate.

What happens if I lose my certificate?

The certificate can be downloaded anytime from your account. However, we can provide the certificate if our team has valid information with proof of completion.

Can I use a smartphone to participate in this course?

This is a radiology course that is heavily based on image-based teaching and interaction. For this to be of maximum benefit, we recommend that you use a desktop or laptop with good computing power. Smartphones will not be allowed in the interactive session.

Can I download the videos to study offline?

Our videos cannot be downloaded as they are available online only. However, you can view the videos at any time within the time frame of the course and the respective module you are undertaking at that time.

Are classes available offline?

The entire course content is delivered in hybrid mode with courses taught online through LMS in the form of videos, reading material, etc. and onsite for discussions with faculty once for every module.

Can I stop a module midway through and finish it later?

Once you begin a module, it will be updated in your Medvarsity portfolio, wherein you can continue and complete modules at your own pace. However, you should complete it during the course/module duration time. Each module is set up to be completed within a limited time frame and it is important to follow this schedule to progress through the training programme.

How are the course assessments made?

Assessments are conducted at regular intervals as the course progresses. The course is divided into several modules. Each module has several components and each component has assessments built into it at nearly every step. These assessments include questions and answers as well as case viewing (on a PACS software inbuilt within the LMS) and reporting, which will be checked by the faculty. Along with periodic assessments at the end of each module with face to face interactions.

What if I am not able to clear the quiz at each level or the final assessment on the first attempt?

You will be given three attempts to clear the quiz at each level. If you are unable to pass the final assessment after three attempts, we will examine the issue and, if possible, address it on an individual basis.

Where can I enrol and find out more?
