

Inaugural ASIASAFE MR Safety Webinar, 5 Dec 2021

Information from AOSR (As of 2021.11.26)

Dear Colleagues,

Awareness needs to be foremost in the minds of everyone involved in the provision of MR services and those who utilise it - all allied health staff including those just involved in transporting patients for MR scans. MRI zoning, metal detectors have been promoted including training on MR safety related matters. Yet, fatal accidents continue to happen every few years, since 2001 - the latest in South Korea on 18th Oct 2021.

Why?

Register for this webinar - with perspectives from radiologists on the topic

What Lessons Have We Learnt from MR Accidents?

Date: 5th Dec, 6.30pm (GMT +8)

Attendance is free but requires registration at

<https://asiasafe.vidocto.com/>
