

The Value Based Radiology Survey in Asia-Oceania by June 4, 2022

Information from AOSR (As of 2022.5.11)

In 2021, the Asian Oceanian Society of Radiology (AOSR) participated in the International Society for Strategic Studies in Radiology (IS3R) Value Based Radiology (VBR) strategic planning process. Since then, the IS3R has ratified the VBR Strategic Plan to promote VBR worldwide.

This survey is open to all radiologists, radiology & hospital management and related healthcare policy and decision makers.

- Google Survey Link: <https://forms.gle/uXNAryefY9rECFYLA>

*If you could not access to the above link, please kindly find the attached survey form, complete it and send to the office (office@aosr.kr) **by June 4, 2022.***

Thank you for participating in this survey. In the process, we hope this will create greater awareness of how we can bring value or if already practicing aspects of VBR, how we can enhance value to our patients and all the healthcare stakeholders.

[About the AOSR VBR Survey]

The 29 questions in this survey are based on the Prioritized Tactics of the Strategic Plan- summarized as follows:

- **Appropriate use criteria:** *Expand impact of AUC and decision support by seeking greater input from non-radiology specialty societies*
- **Quality Safety:** *Prevent/reduce duplicate follow-up exams by ensuring secure access to patient imaging and reports within a centre and region/country*
- **Economics:** *Industry partners expand understanding of imaging equipment purchases with key performance indicators that measure patient outcomes*
- **Communication 1 :** *Research/training in direct patient communication and establish database of good radiologist communicators to be made available to the mass media*
- **Communication 2:** *Develop tool/app to provide patients with disease/imaging specific information, patient-friendly decision support, and report in lay language*
- **Collaboration:** *Radiologists and referrers work in multidisciplinary teams to better understand each other's needs and respond to critical gaps in patient care.*
