Thoughts from the President's Office

-'Do what you can, with what you have, where you are'
- Theodore Roosevelt, 26th US President

Evelyn Lai Ming HO MMed Radiology, FAIMM
AOSR President Apr 2021 - Feb 2023

As my AOSR President's term draws to a close at the AOCR2023 in Bangkok, I wish to express my appreciation and acknowledge everyone who served on the council and committees, and the individuals out there who supported the surveys, were speakers at webinars, moderators, and many other activities of the AOSR & AOSOR, including ASIASAFE and the AOSR secretariat. We hope you enjoyed the AOSR-wide webinars on non-interpretive topics of MR Safety,

Radiation Safety (in collaboration with the IAEA), AI issues that impact all of us as well as educational webinars that the various AOSR committees worked to bring these to fruition. A big thank you as well to the many who attended these webinars and gave us feedback. There are still ongoing projects, such as revamping our AOSR website and the AOSR Structured Template Reporting (ASTeR).
